Brussels - 6th European Public Health Conference – 13-16 November 2013

The plenary programme has been updated and has a wide range of excellent speakers and pannelists. Please check the website for the latest news: www.eupha.org/Brussels2013. We are currently working on the pre conference programme with about 20 interesting sessions being planned at the moment. One of these is the *ASPHER's Annual Young Researchers' Forum*, which offers a unique opportunity for MPH, PhD and postdoc researchers to present their research to a select audience of peers and key representatives of the European public health community. This year's forum will be a collaborative effort with the Canadian Institutes of Health Research – Institute of Population and Public Health, one of 13 Institutes with Canada's federal health research funding council. Therefore, we particularly encourage abstracts from those young researchers conducting interdisciplinary, collaborative and/or comparative research between Europe and Canada or whose research presents opportunities to share best practices or lessons learned from which both Europe and Canada could benefit. All other topics are welcome as well.

Invitation to the CHANCE 2013 conference, Pécs, Hungary, 5-7 September 2013

With the coordination of University of Pécs, a consortium of Danube University Krems, Ernst-Moritz-Arndt-Universität Greifswald, Medizinische Universität Graz, Pavol Jozef Šafárik University in Košice and University of East Anglia and EURIPA as associate partner, has successfully applied in 2010 for the European Commission ERASMUS Lifelong Learning Program with the proposal: *MSc in Migrant Health: Addressing New Challenges in Europe – CHANCE*. The proposal has received 100% of the scores regarding 'European added value'. Now the task has been completed and University of Pécs is going to host an introductory, European level conference in Pécs/ Hungary on 5-7 September this year. Beside the introduction of the curriculum the event will provide excellent opportunity for an EU wide overview, how migrants' and ethnic minorities' assistance related programs are represented in the higher education system. That's why we would like to invite the members of EUPHA members to contribute with their view, comments, and experiences to this overview. EUPHA Migrant and Ethnic Minority Health Section is co-organizer of the conference and high level EC and WHO officials will participate in the event and the discussions. The Conference's website is already available under the link: <http://www.chance2013.eu/>. For personal information you may contact Prof. Istvan Szilard (istvan.szilard@aok.pte.hu) and Dr. Zoltan Katz (zoltan.katz@aok.pte.hu).
